

Technical product information

Pipe Lubricant CHLORIDFREI

pipe lubricant for metal and plastic pipes

Pipe lubricant CHLORIDFREI, a bright, water miscible paste, especially for the assembly of metal and plastic pipes in plumbing, water and heating systems.

Pipe lubricant CHLORIDFREI has been developed exclusively with natural based raw materials. Special anti-corrosion additives avoid corrosion when used on iron materials.

Due to excellent lubricating and gliding properties **pipe lubricant CHLORIDFREI** supports the assembly of the pipes and avoid, if used correctly, the deforming of the gasket within the sealing area and thereby protects against leaks. We recommend applying **pipe lubricant CHLORIDFREI** in sufficient quantities on the back end of the pipe (spigot) just shortly before the installation of the pipes in order to prevent the drying-up of the lubrication film.

Pipe lubricant CHLORIDFREI is available in tubes from 8ml to 1000ml as well as in different cans and buckets up to 10 kg. Special packagings like drums are available on customers demand.

Technical data

Consistency:	paste
Colour:	white/beige
Penetration	310
PH-Value 10%	8,6
Total acid number	33,2
Saponification number	35,4

We recommend to store **pipe lubricant CHLORIDFREI** in closed packages between + 5°C and + 25°C.
